

### **Are you excited about making the world a better place to live and work?**

At A4BEE we believe that the best way to do that is through emerging technologies and innovations, and we are a team of people who share that passion. We connect business and people with advanced technologies (such as IoT or Machine Learning), digital solutions and everything in between. As we enlarge our #tech\_hive, we are looking for talents that share our mission, values and curiosity in Life Science and BioTech.

If you want to contribute your skills and talents to work with us on some really exciting things, we are here for you!

Working at A4BEE means being a part of an inclusive and empowering environment. We strive to create a community that values trust, high quality, relationship and passion. Our team is collaborative and our open-door atmosphere encourages learning - we are always looking for new perspectives!

### **Researcher**

#### **What you will do in our #tech\_hive:**

- Assist in planning and conducting primary and secondary research
- Facilitating the workshops; using the design thinking and UX toolbox

#### **What you need to be successful in becoming one of our bees:**

- Highly developed logical thinking skills, looking for relations and cause and effect sequences
- Basic knowledge of statistics and research methodology
- Ability to learn quickly
- Persistence in searching for necessary information
- Ability to search for key words
- Analytical skills
- Knowledge of databases such as google scholar and ability to use them would be an advantage
- Ability to establish social contacts quickly

#### **And more:**

- Fluency in English (B2) to understand the English industry specific websites, reports, often in business/tech/med languages (nice to

have)

- Facilitation skills
- Interested in ux design
- Ability to read quickly, scan websites and articles and find key information
- Open-minded, empathetic

### **What you'll get in return by becoming part of #tech\_hive:**

- you'll be working as part of a highly engaged team in a fast-paced and continuously evolving environment using the latest technologies with the opportunity to learn something new every day
- have a dedicated and paid time for self-development
- extensive support of work-life balance, flexible working solutions, health & wellbeing activities
- a supportive community and integration events
- conferences, trainings, books, knowledge sharing
- working in the office or remote – it's up to you
- company trips and retreats
- flexible working hours
